

Brady Infrared Inspections, Inc.

Full Service Thermography Providers

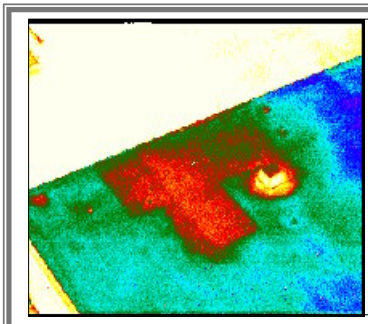

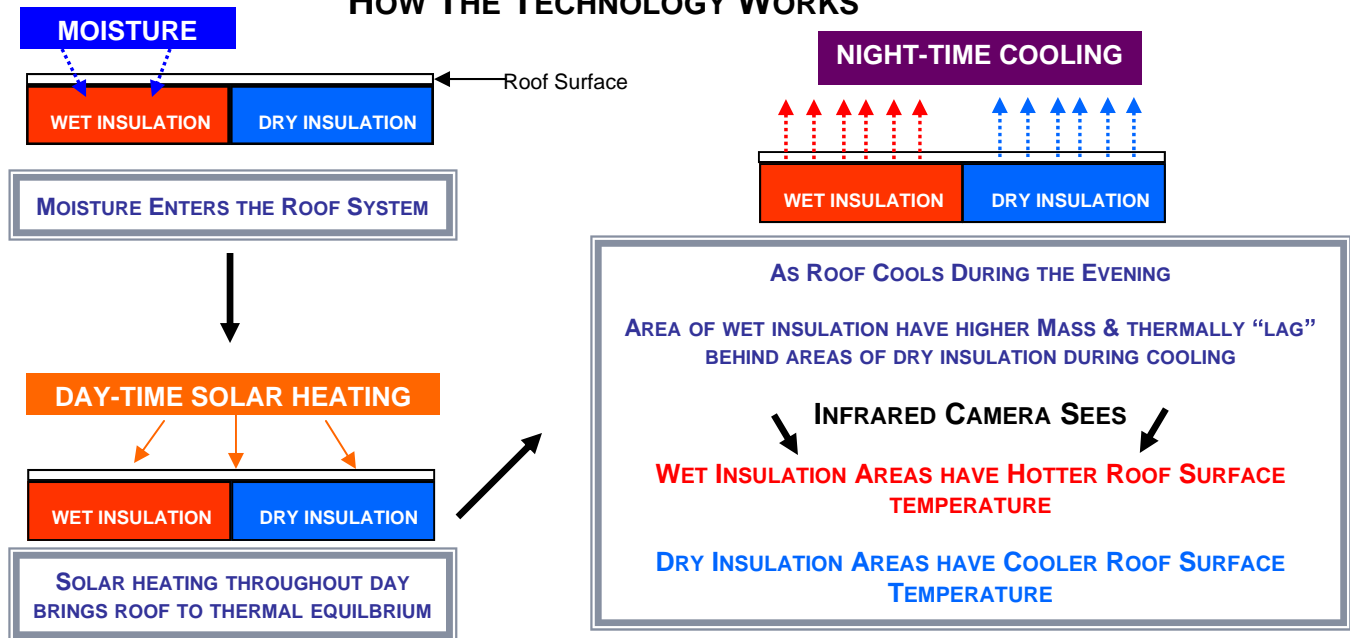

Florida Offices: Stuart 772-288-9884 / Jacksonville 904-626-1603

Roof Systems represents one of the largest assets at a facility. Brady Infrared's "Roof Moisture Survey" helps protect this investment. Take the mystery out of your roof's health by performing an infrared moisture survey.

WALK-ON & AERIAL SURVEYS AVAILABLE

- ★ Precisely target leak repairs on roof surface
- ★ Condition assessment for existing roofs and new properties purchases
- ★ Acceptance testing of new roof systems
- ★ Baseline roof for insurance documentation prior / post hurricane season

HOW THE TECHNOLOGY WORKS

ROOF MOISTURE SURVEY PER WRITTEN GUIDELINES

INCLUDE

INFRARED THERMAL IMAGING

Pinpoint the location of trapped moisture in roof system to simplify and reduce cost of roof repairs and extend life of roof

MOISTURE VERIFICATION

Areas of thermal anomalies are verified for moisture using sensitive moisture probes

AREAS DELINEATED ON ROOF

Hi-visibility paint is used to mark out areas of moisture laden roof insulation

AUTOCAD ROOF MAPS

Wet areas are located on map for easy reference

COMPREHENSIVE REPORT
